Other terms:

1. Prices are exclusive of applicable Government levies and taxes.

2. Delivery of the service will be through APIs to be consumed by you in your application / website.

3. "Per Transaction" means every request for KYC Validation is called through the API. Charges will be levied only for requests with a successful response. Successful response means responses with status "200" or "422" from the APIs irrespective of whether a document was valid or invalid or whether records existed in the corresponding database or not.

4. There are no charges levied for API calls failing due to source's downtime or internal server errors.
